Realm of the dragons: Green tone shows the giant lizards' tiny kingdom.

Approved For Release 2000/08/07 : CIA-RDP96-00788R001400830001-6

Gleam of gold on the hide of a newly hatched Komodo dims with maturity. "The 21½-inch baby weighed next to nothing," said the author. It coiled inside a shell the size of a goose egg.

Their agility belying their bulk, two nine-foot Komodos advance on the bait. Like crocodiles and alligators, they never slither across dry land but always rise up on their legs to move. Wrinkled

876). About a thousand of the lizards—largest in the world—survive on four tropical islands: Komodo, Rintja, Padar, and the southwestern corner of Flores. Hoping to save *Varanus komodoensis* from extinction, the Indonesian Government has proclaimed part of Rintja a dragon sanctuary and has restricted export of the giants.
